

Optimize Space, enhance 24/7 Access and offer Customized Self-Service with Nexbib at Booth #3012

Suwanee, GA, June 11, 2024 – Nexbib leverages decades of specialized experience to offer dynamic Open Library concepts, sophisticated people traffic analysis tools, and flexible self-service ecosystems. Discover our latest innovations which are tailored to meet the evolving needs of our digital society, with a strong focus on sustainability, accessibility, and ergonomics.

With [Nex.Count Occuspace](#), a premier solution in the academic library sector, libraries gain access to precise attendance figures and real-time data for strategic decision-making. This ensures the well-being and safety of library users, optimizes staffing, and improves space management, e.g., in specific zones, during events, by strategically placing resources in high-traffic areas and ensuring optimal staffing levels.

Come talk to us about special pricing incentives for the people traffic products!

Discover [Nex.365 Open Library](#), a flexible concept that extends library hours, welcoming both existing and new community members outside regular staffed hours. This transformation creates a modern, open, and safe space for meeting, working, learning, or playing—available from early morning to late evening, seven days a week.

Experience the next generation of customer service with our [Nex.Kiosk Nordic](#) models. These include desktop or height-adjustable stand-alone units, designed to meet the expectations of today's smartphone society. Customize your kiosk to reflect a unique library atmosphere with a modular screen setup, a fresh user interface, and vibrant promotional images to showcase news, events, and library collections.

Join us to explore these infinitely scalable, instantly deployable, and privacy-safe technologies and RFID ecosystems, empowering libraries to serve their communities in transformative ways.

[Meet us at ALA Booth #3012](#). Let us know your preferred date.
